

# Aerco's CallOff Service

*Short lead times and stable prices are guaranteed through Aerco's CallOff service*

## About CallOff's

Long lead times, unreliable delivery promises and escalating prices are creating a perfect storm for Supply Chain professionals.

Aerco's CallOff service is ideal for supply chain professionals who need to eliminate these risks.

Products ordered under Aerco's CallOff service will be guaranteed to be delivered on time, over an extended period at a fixed price.

Lead time is 1 week, price is guaranteed and your stock holding is nil.

## How It Works

### Service

When you place a purchase order under our CallOff service we agree to supply to you the specified total quantity of product with an agreed end date and at the agreed price for the period. You call for deliveries as needed by your production schedules.

### Stock

As part of setting up the service agreement we will agree the forecast rates of demand for the products. Aerco will place supply orders and reserve stock to ensure that our stock holdings will satisfy those forecasts.

### Simple

When you need product you notify Aerco and we will ship the goods and invoice for that shipment. Each month we will provide you an updated status showing the outstanding quantity and stock availability. At the agreed end date Aerco will ship and invoice the final outstanding balance.
