Network Rail Approved "Plug & Play" Connectors from TT Electronics AB Connectors

The ABCIRH range of connectors from TT Electronics AB Connectors are fully approved by Network Rail for connection of cables to lineside signalling equipment, as specified in NR/L2/SIG/30027.

Based on MIL-DTL 5015 and VG95324 specifications, these connectors feature:

- Reverse Bayonet coupling for positive locking

- Low fire hazard, halogen–free insulators to EN45545

- RoHS compliant black zinc cobalt finish

In Stock at Aerco

Available with no MOQs they come with a range of accessories including grommets, contacts and heatshrink boots.

Suppliers of Plug & Play couplers, disconnection boxes and signalling components for Network Rail can now select the ABCIRH range of connectors from Aerco as a fast response, high quality option which fully meets the requirements of the SE-SK drawings.
